

So, you've created some fantastic content and now you need images. Wouldn't it be great if you could create your own images, to go with your content? Look no further...welcome to world of [Adobe Spark!](https://www.adobe.com/spark)

Using Adobe Spark, you can create social images and graphics. You can even create pages and videos! The best thing about Adobe Spark? It's free to use and it takes no time at all to create an account.

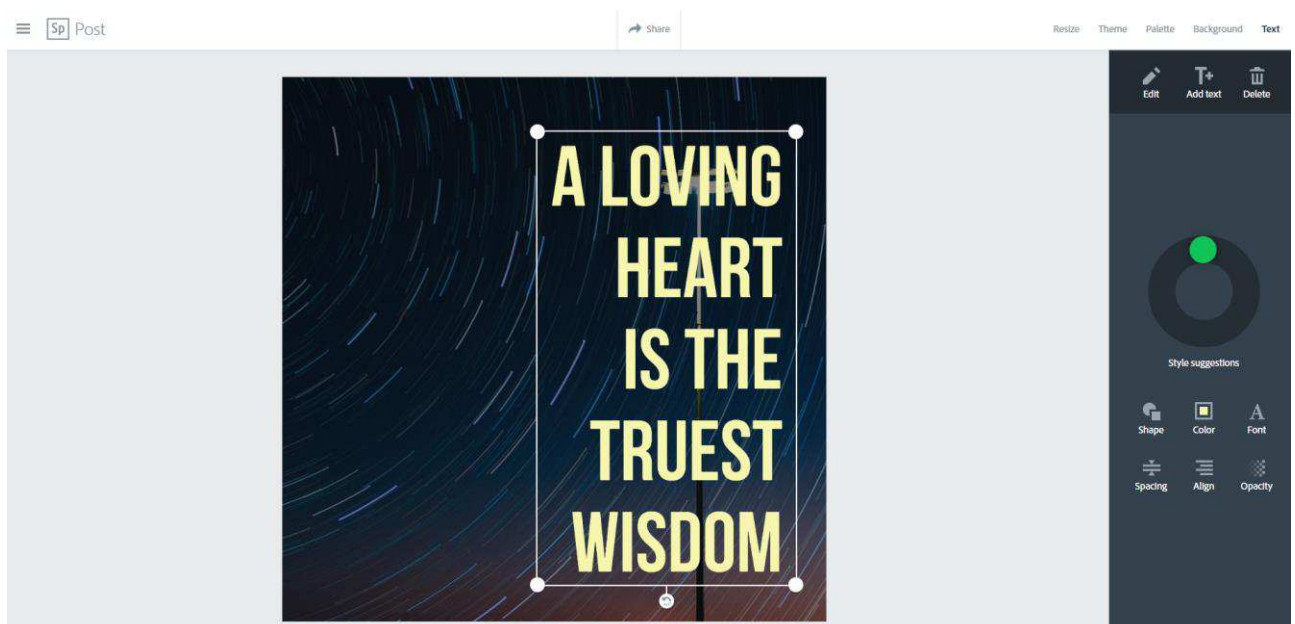

This is what the interface looks like below:

Once you click on **Post**, you can add text in and choose what size you want your post to be. You can always change these at the next stage. Click **Continue**:

Your interface will look like below. You can **resize** the post, change the **theme**, alter the **colour**, change the **background colour** and update the **text** to a range of fonts. Photos can be uploaded and more text can be added:

Once your post is finished, simply click **Share** and your interface will look like below. There is a section here **Get noticed**. Leave it on if you wish for your work to be seen by others or click across to off, if you would prefer not to:

NEW EXCLUSIVE FEATURE! Now you can remove Adobe Spark branding from the stories you share! [Learn more](#)

1. Publish- 2. Share ✕
